

K-LOVE is a unique station that provides modern upbeat and even rock format Christian music and Christian perspective on the news. It is possitive, and encouraging as they claim. There is a wide range of other programming already available in the community. It is the one station that I listen to. Although there are other Christian stations on the air in our area, none of them have the all music format. It is wonderful to have radio broadcasting that has nothing negative or offensive about it. Favoring LPFM broadcasters would either make this service unavailable to me or much more expensive. Since this station is listener supported, that would place an undue burden on the listeners ie, fewer listeners per broadcast area and greater expense. What a combination. What a loss to the greater community if this possitive, encouraging, and commercial free staion and format were lost. We need K-LOVE!!
